

# Maps Lead Scraper

## Installation Guide

Thank you for purchasing Maps Lead Scraper! This guide will walk you through installing the Chrome extension in just a few minutes.

## Installation Steps

### 1 Unzip the Downloaded File

Extract the ZIP file you downloaded to a folder on your computer. Remember where you saved it - you'll need this location in Step 4.

*Tip: Create a folder like 'Chrome Extensions' in your Documents to keep it organized.*

### 2 Open Chrome Extensions Page

Open Google Chrome and type this in the address bar:

`chrome://extensions`

Press Enter to open the Extensions page.

### 3 Enable Developer Mode

Look for the **Developer mode** toggle in the top-right corner of the page. Click it to turn it **ON** (the toggle should turn blue).

This allows you to install extensions that aren't from the Chrome Web Store.

## 4 Load the Extension

Click the **Load unpacked** button that appears in the top-left area.

A file browser will open. Navigate to the folder where you unzipped the extension and select it. Click **Select Folder**.

## 5 Pin the Extension (Optional)

Click the **puzzle piece icon** in Chrome's toolbar (top-right).

Find **Maps Lead Scraper** and click the **pin icon** next to it. This keeps the extension visible in your toolbar for easy access.

# Activating Your License

After installing, you'll need to enter your license key to unlock full access:

1. Open Google Maps and click the Maps Lead Scraper icon
2. Click **Enter License Key** at the bottom of the popup
3. Paste your license key (from your Gumroad purchase email)
4. Click **Activate**

*Your license key can be found in your Gumroad purchase confirmation email, or in your Gumroad Library at [gumroad.com/library](https://gumroad.com/library)*

# Quick Start Guide

Once installed and activated, here's how to scrape your first leads:

1. Go to Google Maps and search for a business type + location (e.g., "plumbers in Chicago")
2. Click the Maps Lead Scraper icon in your toolbar
3. Click **Start Scraping** - the extension will automatically scroll and collect leads

4. Once complete, click **Export CSV** or **Export to Sheets** (Pro) to download your leads
